IFLA Statement on Legal Deposit

“a statutory obligation which requires that any organization, commercial or public, and any individual producing any type of documentation in multiple copies, be obliged to deposit one or more copies with a recognized national institution.”

United Nations
Educational, Scientific and
Cultural Organization

UNESCO Guidelines for legal deposit legislation

“the main purposes of legal deposit are to create a comprehensive collection of national publications and to compile an authoritative national bibliographic record, in order to ensure their preservation and provide easy access to them.”

UNESCO Guidelines for legal deposit legislation @ <http://www.unesco.org/new/en/communication-and-information/resources/publications-and-communication-materials/publications/full-list/guidelines-for-legal-deposit-legislation/> accessed March 2015.

Policies

1. Do the laws of your country require publishers to legally deposit born digital news? In this case we mean that publishers **MUST** send born digital news to one or more legal deposit authorities.
2. Do the laws of your country require cultural heritage institutions (libraries) to harvest news organization websites that are publicly available (not behind a subscription paywall)?
3. Do the laws of your country require cultural heritage institutions (libraries) and publishers to cooperate in order to preserve born digital news when this news is behind a subscription paywall?

Practices

1. Does your library receive born digital news from publishers by FTP or similar means? For this question by "receive" we mean that publishers initiate the transmission of born digital news to the legal deposit authority (library). In tech speak, the publisher "pushes" the news to the authority (library).
2. If publishers "push" news to your library, how does your library decide which publishers? What criteria are used to decide if born digital news from a particular publisher should be preserved?
3. Does your library harvest news websites? If your library does harvest news websites, how frequently does it harvest? Once a day? Once a week? Multiple times per day or week or month?
4. Depending on the publisher, news stories published on the web may be updated several times in an hour, day, or week. Do your library's harvest practices take any action if a news story is updated (new version)?
5. Depending on the frequency of your library's web harvest, the harvest of a news website may miss new versions of a story or may miss entire stories if the publishers updates its website with a higher frequency than it is harvested. If this is the case for your library's harvest schedule, please estimate the number of stories or versions of stories that your library's new harvest misses. ("I don't know" is an acceptable answer.)
6. If your library harvest news websites, how does your library decide which websites? In other words, what criteria are used to decide if born digital news from a particular publisher should be preserved? What criteria are used to determine harvest frequency?
